

Adobe® Connect™ for eLearning

Rapidly create and deliver high-impact online training

Adobe Connect for eLearning provides novices and experts alike with the capabilities needed to easily create and deliver compelling on-demand courses, conduct highly interactive virtual classes, and efficiently manage training programs.

Easily create engaging and compelling online training

With Adobe Connect software, you can easily create and deploy custom training programs that mix and reuse a variety of training assets and activities. Enable nontechnical subject matter experts to create self-paced, on-demand courses directly from Microsoft PowerPoint using Adobe Presenter software. Add voice-over narration and multimedia content to your presentations with Adobe Presenter, or capture screen recordings and create interactive simulations and how-to demos using Adobe Captivate® software. Adobe Connect enables you to:

- Create interactive tutorials and simulations with Adobe Presenter and Adobe Captivate, which automatically publish your courses using Adobe Flash® Professional software.
- Reuse learning assets by recording virtual classroom sessions, and use content libraries to manage your course material.
- Save virtual classroom layouts and content as templates to be shared or for future reuse.
- Incorporate existing content from SCORM- and AICC-compliant learning management systems (LMS).

Deliver engaging virtual classes and on-demand courses

Teach and collaborate from any distance and at any time with a proven software solution that's easy to access and use. With Adobe Connect, you can deliver interactive, engaging course content to employees, partners, or customers via live virtual classrooms, self-paced learning modules, or on-demand training. For example, you can:

- Provide instant access and boost participation with courses based on Flash technology. Adobe Flash Player software is already installed on virtually all Internet-connected computers.
- Easily organize virtual classroom flow and content using customizable layouts.
- Use breakout rooms to focus discussions within your virtual classroom.
- Enable all learners to interact with content simultaneously.
- Provide the same interactivity as a live course in recorded sessions.

Why Adobe Connect for eLearning?

- Easily create high-impact online training.
- Deliver engaging virtual classes and on-demand courses.
- Manage participation, track progress, and assess course effectiveness.
- Easily integrate Adobe Connect with third-party systems.

“To get tens of thousands of employees through the same training would take a tremendous amount of time and resources. With Adobe Connect solutions, we have accelerated staff access to training by as much as 90% and lowered our overall training costs.”

Sally Hoyle, director, learning and organizational development, Borders

Why Adobe Connect?

- Ensure instant, easy meeting access
- Deliver rich, interactive, impactful experiences
- Maintain control of security and compliance
- Extend solution capabilities
- Meet all your web conferencing needs

Standardize on Adobe Connect

Adobe Connect enables your enterprise to standardize on a single web conferencing solution for online meetings, eLearning, and webinars. Adobe Connect provides easy meeting attendance, provides a flexible and extensible architecture, and meets the highest security requirements.

Manage participation, track progress, and assess course effectiveness

Easily enroll users or groups in courses, curriculums, and virtual classrooms, or let users browse an online catalog offered by your organization. You can also set and manage permissions to control who can see certain listings. An Adobe Connect solution makes it possible to:

- Manage enrollment with automated email notifications and optionally set approval processes for self-registering learners to enter courses.
- Easily track individual learner progress and use prerequisites and test-outs to guide access and content selection.
- Assess course effectiveness with robust reports you can customize for a meaningful overview of student progress.
- Leverage industry-standard security for more secure content delivery and confidential result tracking.

Easily integrate Adobe Connect with third-party systems

Adobe Connect provides a variety of integration points with your existing systems and is highly extensible, making it possible for your organization to easily create new capabilities to address your specific business needs. Adobe Connect enables you to:

- Work with virtually any audio provider or teleconferencing platform for richer audio experiences and increased cost-effectiveness.
- Integrate Adobe Connect with several of the top LMS providers to seamlessly deliver and track participation in engaging virtual classrooms.
- Extend and add capabilities to virtual classrooms, such as collaborative problem solving or learning games, using Flash Player compatible content.
