

# Adobe Connect

## Meeting tools are not for virtual trainings

When it is important, it can't be 'good enough'.

### Adobe Connect for Virtual Trainings

Adobe Connect is a powerful virtual training solution that enables trainers to **design** engaging learning experiences, **scale & standardize** them efficiently and **drive, measure & report** training impact with actionable engagement insights.

Transformative virtual trainings for better business outcomes.

Meeting tools are built for single click collaboration.

They lack the critical capabilities required for business-critical live virtual trainings.
